

Front-End Developer

Munteanu Iulian Cosmin

I am a young design engineer working for two years in this company Tata Technologies until now. By gaining experience at this company, I developed my team work skills, communication and tech skills in design programs such as Creo Parametrics, SolidWorks and the Windchill cloud program. Along the way I realized that I want to develop my hobby for IT. I took courses because I didn't go to college for the IT profession and I want to change my profession. I consider myself a junior in IT, learning along the way applications such as HTML, CSS, Javascript, Node, React, PostgreSQL, Web3 and DApps.

Projects
